Electronics & Communication Engineering Department
Program Educational Objectives (PEO)

PEOs	STATEMENTs
PEO 1	Students will acquire knowledge to make them employable in Electronic Design, Telecom as well as IT sectors, become entrepreneur and pursue higher studies in the core and management sector.
PEO 2	Student will possess core competency in Device and Communication systems design and development that helps to meet ever-changing industrial and societal demands.
PEO 3	Students will be exposed to Data Science and computation, Machine Learning, AI, Mechatronics and Bio Electronics through inter departmental/ industrial collaboration.
PEO 4	Students can engage themselves in research work, and development of interpersonal skills and professional ethics (like obeying safety norms & Maintain IEEE standards).
PEO 5	Students will inherit a lifelong learning attitude, adaptability, quality consciousness and punctuality which would facilitate them to get success in professional life
